(54) Title: OXIME CONJUGATES AND METHODS FOR THEIR FORMATION AND USE

(57) Abstract: The present invention relates to biodegradable biocompatible polyketals, methods for their preparation, and methods for treating animals by administration of biodegradable biocompatible polyketals. In one aspect, a method for forming the biodegradable biocompatible polyketals comprises combining a glycol-specific oxidizing agent with a polysaccharide to form an aldehyde intermediate, which is combined with a reducing agent to form the biodegradable biocompatible polyketal. The resultant biodegradable biocompatible polyketals can be chemically modified to incorporate additional hydrophilic moieties. A method for treating animals includes the administration of the biodegradable biocompatible polyketal in which biologically active compounds or diagnostic labels can be disposed. The present invention also relates to chiral polyketals, methods for their preparation, and methods for use in chromatographic applications, specifically in chiral separations. A method for forming the chiral polyketals comprises combining a glycol-specific oxidizing agent with a polysaccharide to form an aldehyde intermediate, which is combined with a suitable reagent to form the chiral polyketal. A method for use in chiral separations includes the incorporation of the chiral polyketals in the mobile phase during a chromatographic separation, or into chiral stationary phases such as gels. The present invention further relates to chiral polyketals as a source for chiral compounds, and methods for generating such chiral compounds.

| Box I     | Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)   |
|-----------|---|
| This Inte | mational Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:  |
|           | Claims Nos.:<br>because they relate to subject matter not required to be searched by this Authority, namely:  |
|           | Claims Nos.: 1-62 (all partially) because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically: see FURTHER INFORMATION sheet PCT/ISA/210 |
| 3.        | Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).  |
| Box II    | Observations where unity of invention is lacking (Continuation of item 2 of first sheet)  |
| This Inte | rnational Searching Authority found multiple inventions in this international application, as follows:  |
|           |   |
| 1.        | As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.  |
|           | As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.  |
|           | As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:  |
| 4.        | No required additional search fees were timely paid by the applicant. Consequently, this international Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:  |
| Remark    | on Protest  The additional search fees were accompanied by the applicant's protest.  No protest accompanied the payment of additional search fees.  |

### FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.2

Claims Nos.: 1-62 (all partially)

Present claims 1-62 relate to a product (a conjugate) or a method defined by reference to a desirable characteristic or property, namely

- (i) carrier
- (ii) modifier
- (iii) detectable label
- (iv) diagnostic label

As a consequence, present claims 1-62 relate to an extremely large number of possible conjugates and methods. In fact, the claims contain so many options and possible combinations that a lack of clarity and conciseness within the meaning of Article 6 PCT arises to such an extent as to render a meaningful search of the claims impossible.

The claims cover all possible products or methods falling under the desirable characteristic or property, which also lacks clarity, but the application provides support in the meaning of Art. 5 PCT for only a limited number of such conjugates.

In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is impossible.

Consequently, the search has been carried out for those parts of the claims which appear to be clear, supported and disclosed, namely those parts relating to the parts of the claimed conjugates which are disclosed in claims 2-4, 7-12, 14,16,18, 21,22,25-27,29-31,36-40, 46,, 47, and 49, as well as the examples in the description.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.
